

THE HUMANOID PROJECT

Objectives:

To develop a social humanoid bot to help people with their daily tasks and ease their lives. To achieve the *physical hardware realization* and perform on *field testing* of the various software algorithms developed at the earliest.

Progress:

Team currently has its speech recognition model. Team has designed most of the appearance of the robot. Has participated in many humanoid competition around the world.

Team Members:

Team consists of 9 members divided into groups based on subdivisions like System Controls, AI engineer, Web & Business, Robot Design.

Hanish and Siddesh are overall Team Leads, with Haris Narrender, Rana Das and Karthikeyan as AI engineers.
